Mixing Tips

When you're mixing ingredients with an electric mixer:

- Read the instructions for the mixer carefully.
- Put your recipe where you can see it.
- Follow the order of the ingredients in the recipe.
- Set the speed on your mixer.
- Set the timer so you'll know how long to mix for.
- Turn on the mixer.

Never take the mixer out of the bowl while it's on. If you do, your ingredients will splatter everywhere!
