Time Practice Tips

To set the time on an analog clock:

- Move the **minute hand** around the clock toward the higher numbers. The **hour hand** will move along with it. Keep moving the minute hand until you see the correct time.

To set the time on a digital clock:

- Press the button that says **hour**. Every time you press it, the hour will go one number ahead. If you press **hour** when the hour is **12**, it will go back to **1**.

- Press the button that says **minute**. The minutes will move ahead. If you press the button and the minute is **59**, it will go back to **00**.
